

## Why Large-Scale Battery Storage?

Large-scale battery storage projects have become a cornerstone of modern energy systems. Their success depends on structured project development, reliable execution and long-term operational management.

**We support the implementation of complex large-scale battery storage projects across their entire lifecycle:**

Project Development

1

Engineering, Procurement & Construction (EPC)

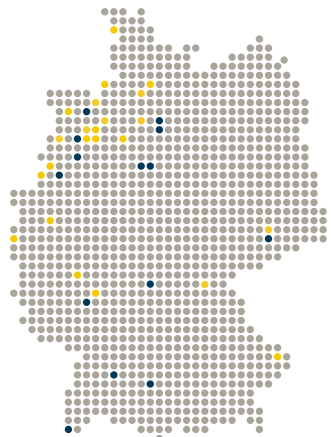

2

Operation & Maintenance (O&M)

3

**Our large-scale battery storage projects in Germany:**

**600+ MWh**  
under construction

**200+ MWh**  
in operation

**Large-Scale Battery Storage.**  
**From End-To-End**

Large Battery Storage Projects

## Project Development We handle the groundwork so your project is ready to launch

Before construction begins, large-scale battery storage projects require careful preparation.

We manage all key development steps to bring projects to ready-to-build status.

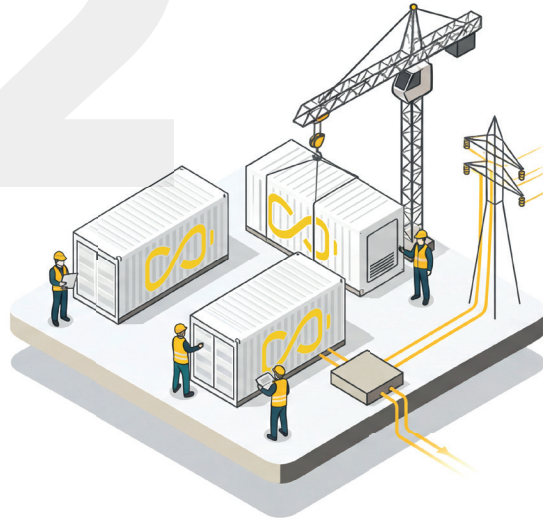

-  Permitting and application procedures
-  Preparation of all required studies and assessments
-  Preparation for EPC implementation
-  Coordination with authorities, grid operators and other stakeholders

## EPC: Turnkey Project Realization – From End-To-End

We deliver large-scale battery storage projects holistically – from project development through to operation.

From ready-to-build stage onward, we take full responsibility as EPC contractor for complete implementation.

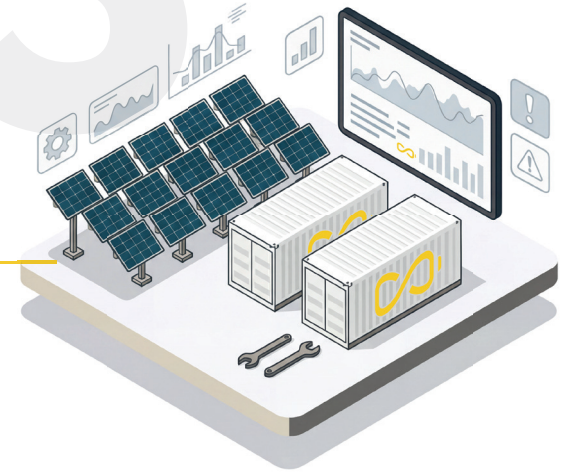

-  Detailed engineering and system design
-  Vendor-independent technology selection
-  Construction, electrical installation and IT/communications concept
-  Logistics, commissioning, testing and certification

## Operation & Maintenance (O&M) We support you beyond commissioning

Reliable operational management is a core element of large-scale battery storage projects.

Even after commissioning, we provide our partners with comprehensive O&M services.

-  24/7 remote-monitoring and fault management
-  Preventive maintenance and servicing
-  Warranty and guarantee management
-  Site management and ensuring system availability
